Resume Summary

I have experience in both technical infrastructure operations and software development. At Türk Telekom, I worked in fiber infrastructure, fault detection, and field operations, while also developing backend-focused web and mobile applications using Laravel, Vue.js, MySQL, and PostgreSQL. I am an analytical problem solver who values teamwork, takes responsibility, and is always eager to learn new technologies and continuously improve my skills.

Experience

Fiberoptics Mechanic

Kalem inşaat Nak.Turz. Petr.Ürn.San.Ve Tic.Ltd.Şti | May 2026 - August 2026

- Performed internet installations on Türk Telekom GPON and MDU fiber infrastructure.
- Diagnosed fiber network faults and carried out on-site troubleshooting and maintenance.

Software Developer

CodeLabs B.V. | February 2026 - April 2026

Seasonal / Project-based

Software Developer

Asiste Software Agency | August 2024 - September 2025

İzmir , Permanent / Full-time

I develop RESTful and GraphQL APIs with Laravel, and I use MongoDB and PostgreSQL in a hybrid structure. I optimize data modeling and management with Eloquent ORM. With Laravel Reverb, I build WebSocket-based real-time systems, actively working on live data flows such as chat and notifications. I also develop modern, user-friendly admin panels using Laravel Blade and create interactive interfaces with Vue.js.

Software Developer

Netpus Yazılım | January 2023 - June 2024

İzmir , Permanent / Full-time

I took an active role in the development processes of CRM, ERP, and CMS projects. I contributed to building modules such as user roles, authorization, data management, e-invoice integration, and virtual POS integrations using Laravel.

Intern

Metadata Bilişim | June 2021 - August 2021

We analyzed and improved projects developed with Kotlin. I gained experience in teamwork, version control with Git, and corporate software development processes.

Intern
